

## Public Review of a Proposed Bridge Project on St. John's Creek Road

St. John's Creek Road crossing St. John's Creek, Franklin County  
Low Water Crossing Replacement – new Bridge over St. John's Creek  
Section 35, T44N, R2W of 5th PM  
Lat. N 38.5214, Long. W 91.1157

The Franklin County Highway Department, as part of the Franklin County Bridge Replacement Program, is planning replacement of a deficient low-water crossing on St. John's Creek Road over St. John's Creek. Preliminary plans are being prepared and construction is expected to start in 2025 or 2026.

The proposed roadway alignment will be close to the existing roadway, but will eliminate some reverse curvature in the existing alignment. The new bridge deck will be above the floodplain overflow. The intersection with St. Ann's Road will be in the same location. The project activities will include, but not necessarily be limited to: Removal of the existing low-water crossing, excavations, pile driving, new bridge construction, placement of rock blanket, construction of roadway embankments and new approach roadway surfacing. Additional Right-of-Way may be needed but has not yet been determined.

Comments will be received until November 1, 2024. Written comments may be sent to Franklin County at the following address:

Franklin County Highway Department
